

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

## Listing of Claims:

1. (Currently Amended) A remote controller comprising:

a ~~switching means~~switch for selecting one of a plurality of options in one dimension out of control items laid out in a plurality of dimensions; and

an item ~~selecting means~~selector for selecting one of a plurality of options in another dimension out of the control items laid out in the plurality of dimensions,

wherein a remote control code in accordance with an output of the ~~switching means~~switch and an output of the item ~~selecting means~~selector is transmitted.

2. (Currently Amended) The remote controller according to claim 1,

wherein the ~~switching means~~switch outputs a first remote control code and

the item ~~selecting means~~selector outputs a second remote control code.

3. (Currently Amended) The remote controller according to claim 1 further comprising:

a ~~determining means~~determiner for determining the remote control code in accordance with the output of the ~~switching means~~switch and the output of the item ~~selecting means~~selector.

4. (Currently Amended) The remote controller according to claim 2,

wherein the ~~switching means~~switch passes through a plurality of contact points in one turn, and

every time the ~~switching means~~switch contacts one of the plurality of contact points, the ~~switching means~~switch outputs the first remote control code assigned to the one of the plurality of contact points.

5. (Currently Amended) The remote controller according to claim 2 further comprising:

a ~~displaying means~~display for ~~showing~~displaying the control items.

6. (Currently Amended) The remote controller according to claim 5, wherein

every time the first remote control code is transmitted, the ~~displaying means~~display displays control items selectable by the item ~~selecting means~~selector for a certain period of time.

7. (Currently Amended) A device comprising a ~~displaying means~~display for ~~showing~~displaying control items in accordance with a signal from the remote controller ~~according to claim 2,~~

a remote controller comprising:

a switch for selecting one of a plurality of options in one dimension out of control items laid out in a plurality of dimensions; and

an item selector for selecting one of a plurality of options in another dimension out of the control items laid out in the plurality of dimensions,

wherein a remote control code in accordance with an output of the switch and an output of the item selector is transmitted,

wherein the switch outputs a first remote control code and

the item selector outputs a second remote control code,

wherein every time the first remote control code is transmitted, the ~~displaying~~  
~~means~~display displays control items selectable by the item ~~selecting means~~selector for a certain  
period of time.
